

Jett-Zeit, Hebrew Conceptions of Time and Names of Torah, Talmud and Kabbalah  
By Shomit Sirohi

In Hebrew Language A Bit

Le organisachiment de le excess du un Prophet es tambien su creation du un langue que es specifique un la  
Judaisme, et tambien le Quran et le Arab filasafa – entendu que tiempes est elliptical.

רִיצָקֵר רֶקֶ כְּרֶשַׁעֲצִקְמָא גּוֹ אִן־קִצְפִּיק / וְקֵ קִדָּא קִסְפִּיקְרִין־מִבְקָץ

#### I. On Hebrew Life and Time Concepts

In fact there are many such things called conceptions of time in Hebrew tradition – we like the recent thing in 1908, called heroic Jett-ziet, it means just the revolution then cool off. Another revolution then cool off again. Like that everything is just as Mizra walked around looking for his building – everything orients in Jewish life to the Jet-Zeit and it is just that orientation, which then ends with Hebrew life winning.

I was then coming to a awakening I added the Bohr quality to Jett-zeit – yes it can be a literary walk into the future – Quran says something like that.

#### II. Other Concepts of Time in Hebrew Life

Non-jett zeit but schlimitz and shallow and shaloma – it just means hello here and there, keeping accounts and documents and files throughout eternity which is repetition and is empty but also filled – filled times of meeting or talking on the phone. Such happiness to be closer to jett-zeit but in real life – imagine Hebrew life at zero-point which is exciting. It is something like closest to the concrete of Hebrew life. Something like Stillstand – something like a running around and taking buses and getting off and being really really concrete – like rejecting anything that is not about my own life – not the hospital – not the law, just my life – its meaning.

#### III. Quran or What?

Women's conception of time in Quran – sex each night and films all day with abstract art = rendered into a concept of time – something like sexual and psychoanalytic time – now-ness determinateness – which in Judaism is also a concept called be with the Prophet and have a good life.

Le-Charte. It means something like a chart we shared when we were studying framed as time – it has to make one logical statement only – is this logic – in the simple women's sense or the Prophet's mathematical sense or his comrades – is there any chart at all – one chart – we call it le'charte – Hotel Management chart. It has the science of hotels and how they last – that's women's time.

#### IV. Metaphors

If abstract time is a experience of the watch and clock life – which is brilliant – I know develop metaphors – history is a conception of its time which has within it abstract art which sees it as Hebrew tree conception of time – just the now, future of nows.

Nobody knows this – now lets be free.
